Harlan Coben believes that if you're a writer, you'll find the time; and that if you can't find the time, then writing isn't a priority and you're not a writer. For him writing is a 1 job - a job like any other. He has 2 it with plumbing. Pointing out that a plumber doesn't wake up and say that he can't work with pipes today.

3, like most writers these days, you're holding down a job to pay the bills, it's not 4 to find the time to write. But it's not impossible. It requires determination and single-mindedness. 5 that best selling authors began writing when they were doing other things to earn a living. And today, even writers who are fairly 6 often have to do other work to 7 their writing income.

As Harlan Coben has suggested, it's a 8 of priorities and some things you really enjoy. To make writing a priority, you'll have to 9 some of your day-to-day activities and some things you really enjoy. Depending on your 10 and your lifestyle, that might mean spending less time watching television or listening to music, though some people can write 11 they listen to music. You might have to 12 the amount of exercise or sport you do. You'll have to make social media an 13 activity rather than a daily, time-consuming 14. There'll probably have to be less socializing with your friends and less time with your family. It's a 15 learning curve, and it always won't make you popular.

There's just one thing you should try to keep at least sometime for 16 your writing - and that's reading. Any writer needs to read as much and as widely as they can; it's the one 17 supporter - something you can't do without.

Time is finite. The older you get, the 18 it seems to go. We need to use it carefully and as 19 as we can. That means prioritizing our activities so that we spend most time on the things we really want to do. If you're a writer, that means 20 — writing.

Section II Reading Comprehension

Part A

Directions: Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

Text 1

On a recent sunny day 13,000 chickens roam over Larry Browns 40 windswept acres in Shiner, Texas. Some rest in the shade of a parked car. Others drink water with the cows. This all seems random, but it's by design, part of what the \$6.1 billion US egg industry bets will be its next big thing: climate-friendly eggs.

These eggs, which are making their debut now on shelves for as much as \$8 a dozen, are still labeled organic and animal-friendly, but they're also from birds that live on farms using regenerative agriculture—special house gases. Such eggs could be marketed as helping to fight climate change.

"I'm excited about our progress," says Brown, who is adding more cover crops that draw worms and crickets for the chickens to eat. The birds' waste then fertilizes fields. Such improvements "allow our hens to forage for higher-quality natural feed that will be good for the land, the hens, and the eggs that we supply to our customers."

The egg industry's push is the first major test of whether animal products from regenerative farms can become the next premium offering, in barely more than a niche product in natural foods stores to being sold at Walmart. More recently there were similar doubts about probiotics and plant-based meats, but both have exploded into major supermarket categories. If the sustainable-egg roll out is successful, it could open the floodgates for regenerative beef, broccoli, and beyond.

Regenerative products could be a hard sell because the concept is tough to define quickly, says Julie Stanton, associate professor of agricultural economics at Pennsylvania State University Brandywine. Such farming also brings minimal, if any, improvement to the food products (though some producers say their eggs have more protein).

The industry is betting that the same consumers paying more for premium attributes such as free-range, non-GMO, and pasture-raised eggs will embrace sustainability. Surveys show that younger generations are more concerned about climate change, and some of the success of plant-based meat can be chalked up to shoppers wanting to signal their desire to protect the environment. Young adults "really care about the planet," says John Brunnquell, president of Egg Innovations. "They are absolutely altering the food chain beyond what I think even they understand what they're doing."

21. the climate-friendly eggs are produced _____

- A. at a considerably low cost
- B. at the demand of regular shoppers
- C. as a replacement for organic eggs
- D. on specially designed farms

22. Larry Brown is excited about his progress in _____

- A. reducing the damage of worms
- B. accelerating the disposal of waste
- C. creating a sustainable system
- D. attracting customers to his products

23. the example of organic eggs is used in the Paragraph 4 to suggest _____

- A. the doubts to over natural feeds
- B. the setbacks in the eggs industry
- C. the potential of regenerative products
- D. the promotional success of supermarkets

24. It can be learned from the last paragraph that young people _____

- A. are reluctant to change their diet
- B. are likely to buy climate -friendly eggs
- C. are curious about new food s
- D. are amazed at agriculture advances

25. John Brungvell would disagree with Julie Stanton over regenerative products ' _____

- A. markets prospects
- B. nutritional value
- C. standard definition
- D. moral implications

Text 2

More Americans are opting to work well into retirement, a growing trend that threatens to upend the old workforce model.

One in three Americans who are at least 40 have, or plan to have a job in retirement to prepare for a longer life, according to a survey conducted by Harris Poll for TD Ameritrade. Even more surprising is that more than half of "unretirees" - those who plan to work in retirement or went back to work after retiring - said they would be employed in their later years even if they had enough money to settle down, the survey showed.

Financial needs aren't the only culprit for the "unretirement" trend. Other reasons, according to the study, include personal fulfillment such as staying mentally fit, preventing boredom or avoiding depression. "The concept of retirement is evolving," said Christine Russell, senior manager of retirement at TD Ameritrade. "It's not just about finances. The value of work is also driving folks to continue working past retirement."

One reason for the change in retirement patterns: Americans are living longer. Older Americans are also a percentage of retirement-age people in the labor force has doubled over the past three decades. About 20% of people 65 and older were in the workforce in February 2019, up from an all-time low of 10% in January 1985 according to money manager United Income.

Because of longer life spans, Americans are also boosting their savings to preserve their nest eggs, the TD Ameritrade study showed, which surveyed 2,000 adults between 40 to 79. Six in 10 "unretirees" are increasing their savings in anticipation of a longer life. Among the most popular ways they are doing this, the company said, is by reducing their overall expenses, securing life insurance or maximizing their contributions to retirement accounts.

Unfortunately, many people who are opting to work in retirement are preparing to do so because they are worried about making ends meet in their later years, said Brent Weiss, a

co-founder at Baltimore -based financial -planning firm Facet Wealth. He suggested that pre-retirees should speak with a financial adviser to set long -term financial goals.

"The most challenging moments in life are getting married, starting a family and ultimately retiring," Weiss said. "It's not just a financial decision, but an emotional one. Many people believe they can't retire. "

26. The survey conducted by Harris Poll indicates that _____

- A. over half of the retirees are physically fit for work
- B. the old workforce is as active as the younger one
- C. one in three Americans enjoy earlier retirement
- D. more Americans are willing to work in retirement

27. It can be inferred from Paragraph 3 that Americans tend to think that _____

- A. retirement may cause problems for them
- B. boredom can be relieved after retirement
- C. the mental health of retirees is overlooked
- D. "unretirement" contributes to the economy

28. Retirement patterns are changing partly due to _____

- A. labor shortages
- B. population growth
- C. longer life expectancy
- D. rising living costs

29. Many "unretirees" are increasing their savings by _____

- A. investing more in stocks
- B. taking up odd jobs
- C. getting well-paid work
- D. spending less

30. With regard to retirement Brent Weiss thinks that many people are _____

- A. unprepared
- B. unafraid
- C. disappointed
- D. Enthusiastic

We have all encountered them, in both our personal and professional lives. Think about the times you felt tricked or frustrated by a membership or subscription that had a seamless sign-up process but was later difficult to cancel. Something that should be simple and transparent can be complicated intentionally or unintentionally in ways that impair consumer choice, these are examples of dark patterns.

First coined in 2010 by user experience expert Harry Brignull, "dark patterns" is a catch-all term for practices that manipulate user interfaces to influence the decision-making ability of users. Brignull identifies 12 types of common dark patterns, ranging from misdirection and hidden costs to roach motel, "where a user experience seems easy and intuitive at the start, but turns difficult when the user tries to get out."

In a 2019 study of 53,000 product pages and 11,000 websites, researchers found that about one in 10 employs these design practices. Though widely prevalent, the concept of dark patterns is still not well understood. Business and non-profit leaders should be aware of dark patterns and try to avoid the gray areas they engender.

Where is the line between ethical, persuasive design and dark patterns? Businesses should engage in conversations with IT, compliance, risk, and legal teams to review their privacy policy, and include in the discussion the customer/user experience designers and coders responsible for the company's user interface, as well as the marketers and advertisers responsible for sign-ups, checkout baskets, pricing, and promotions. Any or all these teams can play a role in creating or avoiding "digital deception".

Lawmakers and regulators are slowly starting to address the ambiguity around dark patterns, most recently at the state level. In March the California Attorney General announced the approval of additional regulations under the California Consumer Privacy Act (CCPA) that ensure that consumers will not be confused or misled when seeking to exercise their data privacy rights. The regulations aim to ban dark patterns - this means prohibiting companies from using "confusing language or unnecessary steps such as forcing them to click through multiple screens or listen to reasons why they shouldn't opt out."

As more states consider promulgating additional regulations, there is a need for greater accountability from within the business community. Dark patterns also can be addressed on a self-regulatory basis, but only if organizations hold themselves accountable, not just to legal requirements, but also to industry best practices and standard.

- A. improve user experiences
- B. leak user information for profit
- C. undermine users' decision-making
- D. remind users of hidden costs

32. The 2019 study on dark patterns is mentioned to show _____

- A. their major flaws
- B. their complex designs
- C. their severe damage
- D. their strong presence

33. To handle digital deception, businesses should _____

- A. listen to customer feedback
- B. talk with relevant teams
- C. turn to independent agencies
- D. rely on professional training

34. The additional regulations under the CCPA are intended to show _____

- A. guide users through opt-out processes
- B. protect consumers from being tricked
- C. grant companies data privacy rights
- D. restrict access to problematic content

35. According to the last paragraph, a key to coping with dark patterns is _____

- A. new legal requirements
- B. businesses' self-discipline
- C. strict regulatory standards
- D. consumers' safety awareness

Text 4

Although ethics classes are common around the world, scientists are unsure if their lessons can actually change behavior: evidence either way is weak, relying on contrived laboratory tests or sometimes unreliable self-reports. But a new study published in *Cognition* found that, in at least one real-world situation, a single ethics lesson may have had lasting effects.

The researchers investigated one class session's impact on eating meat. They chose this particular behavior for three reasons, according to study co-author Eric Schwitzgebel, a philosopher at the University of California, Riverside: students' attitudes on the topic are variable and unstable, behavior is easily measurable, and ethics literature largely agrees that

eating less meat is good because it reduces environmental harm and animal suffering. Half of the students in four large philosophy classes read an article on the ethics of factory-farmed meat, optionally watched an 11-minute video on the topic and joined a 50-minute discussion. The other half focused on charitable giving instead.

Then, unknown to the students, the researchers studied their anonymized meal-card purchases for that semester: nearly 14,000 receipts for almost 500 students. Schwitzgebel predicted the intervention would have no effect; he had previously found that ethics professors do not differ from other professors on a range of behaviors, including voting rates, blood donation and returning library books. But among student subjects who discussed meat ethics, meal purchases containing meat decreased from 52 to 45 percent—and this effect held steady for the study's duration of several weeks. Purchases from the other group remained at 52 percent.

“That’s actually a pretty small intervention,” says psychologist Nina Strohminger at the University of Pennsylvania, who was not involved in the study, “but it cannot rule out some unknown confounding variable. And if real, she notes, it might be reversible by another nudge: “Easy come, easy go.” Schwitzgebel suspects the greatest impact came from social influence: classmates or teaching assistants leading the discussions may have shared their own vegetarianism, showing it as achievable or more common. Second, the video may have had an emotional impact. Least rousing, he thinks, was rational argument, although his co-authors say reason might play a bigger role. Now the researchers are probing the specific effects of teaching style, teaching assistant seating habits and students’ video exposure. Meanwhile Schwitzgebel—who had predicted no effect—will be eating his words.

36. Scientists generally believe that the effects of ethics classes are _____

- A. hard to determine
- B. narrowly interpreted
- C. difficult to ignore
- D. poorly summarized

37. Which of the following is a reason for the researchers to study meat-eating?

- A. It is common among students
- B. It is a behavior easy to measure.
- C. It is important to students' health.
- D. It is a hot topic in ethics classes.

38. Eric Schwitzgebel's previous findings suggest that ethics professors _____

- A. are seldom critical of their students
- B. are less sociable than other professors
- C. are not sensitive to political issues
- D. are not necessarily ethically better

39. Nina Strohminger thinks that the effect of the intervention is _____

- A. permanent
- B. predictable
- C. uncertain
- D. unrepeatable

40. Eric Schwitzgebel suspects that _____ the students'

- A. can bring psychological benefits
- B. can be analyzed statistically
- C. is a result of multiple factors
- D. is a sign of self-development

Part B

Directions:

Read the following text and answer the questions by choosing the most suitable subheading from the list A-G for each numbered paragraph (41-45). There are two extra subheadings which you do not need to use. Mark your answers on the ANSWER SHEET. (10 points)

- A. Make it a habit
- B. Don't go it alone
- C. Start low go slow
- D. Talk with your doctor
- E. Listen to your body
- F. Go through the motions
- G. Round out your routine

Getting back into exercise can be a challenge in the best of times, but with gyms and in-person exercise classes off-limits to many people these days because of COVID-19 concerns, it can be tricky to know where to start. And it's important to get the right dose of activity. "Too much too soon either results in injury or burnout," says Mary Yoke, PhD, a faculty member in the kinesiology department at Indiana University in Bloomington. Follow this advice to return to exercise safely.

41. _____

Don't try to go back to what you were doing before your break. If you were walking 3 miles a day, playing 18 holes of golf three times a week, or lifting 10-pound dumbbells

for three sets of 10 reps, reduce activity to ½ mile every other day, or nine holes of golf once a week with short walks on other days, or use 5 -pound dumbbells for one set of 10 reps. Increase time, distance, and intensity gradually. “ This isn ’ t something you can do overnight, ” Denay says. But you ’ll reap benefits such as less anxiety and improved sleep right away.

42. _____

If you ’ re breathing too hard to talk in complete sentences, back off. If you feel good, go a little longer or faster. Feeling wiped out after a session? Go easier next time. And stay alert to serious symptoms, such as chest pain or pressure, severe shortness of breath or dizziness, or faintness, and seek medical attention immediately.

43. _____

Consistency is the key to getting stronger and building endurance and stamina. Ten minutes of activity per day is a good start, says Marcus Jackovitz, DPT, a physical therapist at the University of Miami Hospital. All the experts we spoke with highly recommend walking because it ’ s the easiest, most accessible form of exercise. Although it can be a workout on its own, if your goal is to get back to Zumba classes, tennis, cycling, or any other activity, walking is also a great first step.

44. _____

Even if you can ’ t yet do a favorite activity, you can practice the moves. With or without a club or racket, swing like you ’re hitting the ball. Paddle like you ’re in a kayak or canoe. Mimic your favorite swimming strokes. The action will remind you of the joy the activity brought you and prime your muscles for when you can get out there again.

45. _____

Exercising with others “ can keep you accountable and make it more fun, so you ’re more likely to do it again, ” Jackovitz says. You can do activities such as golf and tennis or take a walk with others and still be socially distant. But when you can ’ t connect in person, consider using technology. Chat on the phone with a friend while you walk around your

neighborhood. Face Time or Zoom with a relative as you strength train or stretch at home. You can also join a live stream or on-demand exercise class.

Section III Translation

46. Direction:

In this section there is a test in English. Translate it into Chinese. Write your translation on ANSWER SHEET. (15points)

Although we try our best, sometimes our painting rarely turn out as originally planned. Changes in the light, the limitations of your painting materials, and lack of experience and technique mean that what you start out trying to achieve may not come to life the way that you expected.

Although this can be frustrating and disappointing, it turns out that this can actually be good for you. Unexpected results have two benefits: you pretty quickly learn to deal with disappointment and realize that when one door closes, another opens. You also quickly learn to adapt and come up with creative solutions to the problems the painting presents, and thinking outside the box will become your second nature.

In fact, creative problem-solving skills are incredibly useful in daily life, with which you're more likely to be able to find a solution when a problem arises.

Section IV Writing

Part A

47.Directions:

Suppose you are planning a campus food festival. Write an email to the international students in your University to

- 1) introduce the food festival, and
- 2) invite them to participate.

Part B

48. Directions:

Describe the following picture. You should

- 1) Interpret the chart, and

2) give your comments

You should write at least 150 words under the "Own Undertakings After Graduation".

Write your essay on ANSWER SHEET.(15points)

2022

1-5: BBADC 6-10 ACCBB 11-15: CDBAA 16-20: DADCD

A

21-25: DCCBA 26-30: DACDA 31-35: CDBBB 36-40: ABDCC

B

41-45: CEAFB

Dear All, I am the head of the Office of International Affairs of our university, which is a major sponsor for all the activities for international students. I'm writing the letter for the purpose of inviting you to the up-coming campus food festival.

The festival is scheduled to take place at main building on the third of January. I'll feel it an honor and great pleasure if you could come. There will be a reception at the two p.m., at which the vice president of the university would address and welcome you to our university. I hope you will attend too.

Since your presence is of vital importance to this occasion, I do hope you can make it. Just call our office at 010-69985421 for further information, and you will be more than welcome to bring your home-made food with you. I'm looking forward to seeing you at that day.

Yours truly,

Li Ming

What is shown in the chart above reveals clearly that remarkable changes have taken place with regard to the express delivery volume in China from year 2018-2020. Based upon the data of the chart, one can see that the delivery volume from the rural areas of China has been on a steady rise all the time, especially from 2019-2020. In the year of 2019, it was only about 15 billion pieces, while within a year, it went up to 30 billion in 2020 with an amazing increase of 100%.

It's of no difficulty to come up with several possible factors to account for the trend. At the top of the list, with the rapid development of delivery industry, major delivery companies have set up millions of branches so as to satisfy almost everyone in China for their need of buying online. In the second, we must admit that there is a huge change of mentality of shopping among people who live in the rural areas.

Online shopping has long become a common life-style for the people in the cities and now an increasing amount of residents in the countryside have also accept and welcome the new way of shopping.

Last but not the least, the fact could not be ignored that the overall development of economy and the wild spread and influence of social media have undoubtedly trigger people's urge to buy online. At the same time, the fierce competition of online sales have made online purchase even more tempting.

Considering which has been argued so far, we could safely come to the conclusion that the trend is normal and acceptable. Accordingly, it is of no necessity for the public to regard it with too much anxiety. Delivery, as a branch of service industry, would continue to be a strong economic factor for the future.
